A HALLIDAY HOME  
FOUR ROOMS AND BATHROOM  
Size 21' 6" x 37' 0"

... An ideal home for the city,— narrow enough for a city lot, roomy enough for the average family and with an individuality which makes it stand out from the neighbouring houses. As the plan shows, the ground floor is, in itself, a complete home for a small family, having a large combined living-dining room, also a kitchen, two bedrooms and a bathroom. Should more room be needed later on, two large bedrooms can be added in the attic as indicated by dotted lines and in the meantime this space can be used for storage. This cleverly planned home is shown in brick with stucco gables but can be readily adapted for construction with stucco walls if preferred.

**"DANBURY"**  
A HALLIDAY HOME  
FIVE ROOMS AND BATHROOM  
Size 26' 10" x 35' 9"

For those who require a home that is modern in design, individual in appearance and yet comfortable and homelike, we offer this smart new plan. Unusual individuality is achieved in this home by such features as the quaint "port-hole" window in the gable and the inviting front entrance with graceful, curving balustrade and hooded front door. A very modern feature is the corner window which gives an up-to-date appearance to the exterior and a distinctive touch to the large living room. But distinctive design has not been achieved at the expense of comfort and convenience. Every attention has been paid to those details which are necessary in a well-planned house, with the result that our Danbury home is as pleasant to live in as it is attractive to look at. We think you'll like this home built in frame construction as shown, but, if you prefer, it can be built with stucco walls instead.
